Axion Hedge Fund: Complete Trading & Intelligence Setup

A personal, AI-native investment operation powered by Claude Code

1. Overview

Axion is a personal hedge fund operation managing three crash-ready portfolios across India (INR), US & Global (USD), and Canada (CAD). It’s built entirely on Claude Code as the orchestration layer — with 73+ MCP tools, 4 automated pipelines, 7 broker connections, 8 data APIs, and a suite of custom skills for every aspect of the investment workflow.

Not a commercial fund. This is one person’s complete investment infrastructure — from morning briefings to crisis analysis to trade execution.

Key Numbers

Metric	Value
Total Portfolio Value	~\$110K USD equivalent (78.5L + \$43K + C\$23K)
Broker Accounts	7 (TD, Questrade, Wealthsimple, IBKR, Zerodha, Dhan, Kraken)
Currencies	INR, USD, CAD, BTC
Data APIs	8 (EODHD, Chart-IMG, SnapTrade, Treasury Direct, FRED, DeFiLlama, IBKR, Finnhub)
MCP Tools	73+ across 3 services
Claude Code Skills	10 trading-specific (/premarket, /pipeline, /portfolio-status, /market-pulse, /broker-health, /thesis-check, /war-room, /digest, /deploy, /save-session)
Automated Pipelines	4 (morning-intel, war-daily, weekly-screen, manipulation-monitor)
Research Library	400+ files (AxionResearch, investment-research, crisis research)
Deployed Dashboards	5 (portfolio, stock-tracker, Iran crisis public/private, Meridian)

2. Architecture

CLAUDE CODE (Opus 4.6)
Orchestration & Intelligence

Skills: /premarket /war-room
/thesis-check /digest
/broker-health /pipeline

Agents: exposure-calculator
news-gatherer
historical-analogue

MCP TOOL LAYER

DATA & RESEARCH

TradingCLI (28 tools)	EODHD (prices, news)
liquidity-tracker (25)	Chart-IMG (charts)
bond-tracker (14)	Treasury Direct (bonds)
india-mcp (6)	FRED (central banks)
	DeFiLlama (stablecoins)
Total: 73+ tools	Finnhub (real-time)

BROKER LAYER

TD Direct (USD)	Screenshot-based (no API)
Questrade (USD)	SnapTrade OAuth
Wealthsimple (CAD)	SnapTrade (read-only)
IBKR (CAD/USD)	ib-async (paper mode)
Zerodha (INR)	kiteconnect (SEBI 24hr expiry)
Dhan (INR)	Static API key (not yet funded)
Kraken (BTC)	API key+secret

OUTPUT LAYER

Dashboards (5 deployed)
 Reports (daily/weekly)
 Digests (CSV time-series)
 Memory (auto-updated)
 Alerts (threshold-based)

3. Portfolios

Portfolio A: India (INR)

Ticker	Sector	Allocation	Entry Trigger
GOLDBEES	Gold	15%	Nifty <23500 or INR >93
HAL	Defense	12%	India defense budget news
BEL	Defense	10%	Same
TCS	IT Services	10%	Rupee weakness play
INFY	IT Services	8%	Same
ONGC	Energy	10%	Oil >\$90
COALINDIA	Energy	8%	Stagflation hedge
Cash	—	27%	Deploy on triggers

- **Total:** 78.5L (~\$93K USD at current rates)
- **Broker:** Zerodha (2L cash + 30L incoming from MF redemption), Dhan (planned 5L for algo)
- **Thesis:** India defense spending + stagflation hedge + rupee depreciation

Portfolio B: US & Global (USD)

Ticker	Sector	Allocation	Conviction
NTR	Fertilizer	10%	HIGH
EQNR	Energy (Norway)	15%	HIGH

Ticker	Sector	Allocation	Conviction
GDX	Gold Miners	10%	HIGH
KTOS	Defense (Drones)	5%	MEDIUM
AVAV	Defense (Drones)	5%	HIGH
TSM	Semiconductors	5%	MEDIUM
CCJ	Uranium	8%	HIGH
Cash	—	20%	—

- **Total:** ~\$43,000
- **Brokers:** TD RRSP (primary), Questrade FHSA (secondary), IBKR TFSA (international)
- **Thesis:** Energy supercycle + defense spending surge + de-dollarization gold bid

Portfolio C: Canada (CAD)

Ticker	Sector	Allocation
XEG.TO	Energy ETF	30%
SU.TO	Suncor (Oil Sands)	20%
CVE.TO	Cenovus (Oil Sands)	20%
XGD.TO	Gold Miners ETF	15%
CCO.TO	Cameco (Uranium)	15%

- **Total:** ~C\$23,000
- **Broker:** Wealthsimple (3 accounts: FHSA, RRSP, TFSA)
- **Thesis:** Canadian energy + gold exposure in CAD

Deployment Triggers

Trigger	Condition	Action
VIX Spike	$VIX > 35$	Deploy Tranche 1 (30% of each portfolio)
Nifty Crash	$Nifty < 23,500$	Deploy India portfolio
SPY Crash	$SPY -3\%$ intraday	Deploy US portfolio
TSX Energy Crash	$TSX\ Energy -5\%$	Deploy Canada portfolio
Oil Spike	$Oil > \$110$	Trim energy, add gold

Rule: NEVER deploy all at once. Tranched: $T1 \rightarrow T2 \rightarrow T3$ with specific triggers per tranche.

4. Data Infrastructure

Active APIs

API	Type	Cost	Key Data	Rate Limits
EODHD	Market data	\$99/mo	EOD prices, intraday, fundamentals, news, macro, 70+ exchanges	5 concurrent
Chart-IMG	Charts	Paid	TradingView-quality PNG charts with RSI/MACD/BB overlays	2 concurrent
SnapTrade	Broker bridge	Free	Questrade + Wealthsimple position sync	—

API	Type	Cost	Key Data	Rate Limits
Treasury Direct	US debt	Free	Live public debt (\$39T+), auction data, debt-to-the-penny	—
FRED	Central banks	Free (demo)	Fed, ECB, BOJ, PBOC balance sheets for liquidity tracking	—
DeFiLlama	Crypto	Free	Stablecoin supply (USDT + USDC) for liquidity model	—
IBKR	Broker	Free	Paper trading, real-time data (pending live approval)	—
Finnhub	Real-time	Free	Stock-tracker frontend, 60 req/min	60/min

MCP Tool Inventory (73+ Tools)

Service	Tools	Key Capabilities
TradingCLI	28	Quotes, charts, portfolio, execution, screening, analysis across all brokers
TradingCLI India	6	Zerodha/Dhan specific: holdings, orders, positions, funds
Liquidity Tracker	25	Global liquidity index, central bank data, stablecoins, correlations, cycle analysis
Bond Tracker	14	Bond search, yield curves, credit spreads, auction data, live Treasury debt

5. Automated Pipelines

Pipeline 1: Morning Intel

- **Schedule:** 5:30 AM PT / 8:30 AM ET, weekdays
- **Duration:** ~2 minutes
- **What:** Portfolio snapshot → macro dashboard → overnight news → threshold alerts
- **Thresholds:** VIX >35, DXY >110, Oil >\$110, INR >93, Nifty <23,500
- **Output:** reports/daily/morning-intel-YYYYMMDD.md

Pipeline 2: Weekly Screen

- **Schedule:** Sunday 5 PM PT / 8 PM ET
- **What:** Value screen (P/E, FCF) → momentum screen (RSI, crosses) → insider scan → country rotation
- **Output:** reports/weekly/weekly-screen-YYYYMMDD.md

Pipeline 3: War Daily

- **Schedule:** 9 AM, 1 PM, 6 PM PT (3x daily, weekdays)
- **What:** Oil complex → stress indicators → geopolitical OSINT → position impact
- **Output:** reports/daily/war-daily-YYYYMMDD-HHMM.md

Pipeline 4: Manipulation Monitor

- **Schedule:** Saturday weekly
- **What:** CFTC COT → COMEX volume analysis → physical premiums → bank participation
- **Output:** reports/weekly/manipulation-YYYYMMDD.md

Cost: ~\$0.24/day for Grok queries + EODHD subscription

6. Claude Code Skills for Trading

Skill	What It Does	Agents
/premarket	Full pre-market pipeline: batch ticker analysis, charts, macro, report	—
/pipeline	Self-healing ticker analysis with checkpointing, 3 parallel workers, rate-limit recovery	—
/portfolio-status	Quick position check across all 7 brokers, P&L, alerts	—
/market-pulse	Real-time market news + X/Twitter sentiment + key levels	—
/broker-health	Check all 7 broker tokens, rate limits, balances before trading	—
/thesis-check	Compare actual positions vs CURRENT-THESIS.md, flag drift/violations	exposure-calculator
/war-room	Crisis analysis: 3 parallel agents (news + exposure + historical) in <3 min	news-gatherer, exposure-calculator, historical-analogue
/digest	Process newsletters (Ed Steer, FFFT, Bear Traps) → structured data + PDF + CSV time-series	—
/save-session	Preserve trading session context for next conversation	—
/research	Structured research gathering with WebSearch/WebFetch	—

7. Deployed Dashboards

Dashboard	URL	What
Axion Portfolio	github.io/portfolio/ (PIN: 2806)	3 portfolios + currencies + bonds
Stock Tracker	github.io/stock-tracker/	11 investor trackers (Buffett, Dalio, etc.)
Iran Crisis (Public)	github.io/portfolio/us-iran-crisis-research/ (PIN: 2805)	Public research dashboard
Iran Crisis (Private)	github.io/portfolio/us-iran-crisis-research/private/ (PIN: 2806)	P&L, execution, reports
Meridian AI Capital	github.io/meridian-ai-capital/	Quant platform dashboard
Liquidity Tracker	localhost:3001	Global Liquidity Index (local)
Bond Tracker	localhost:3000	Bond market (local)

8. Research Library

Collection	Files	What
AxionResearch	177 files	Full research library
India Q1 2026	45 articles	India-focused deep research
Investment Research	Multi-folder	India/Canada/US/Portfolio/VedicAstro
US-Iran-Feb28	22 reports	Iran crisis analysis + trading guide
33rd Parallel	59 files	Vedic/statistical/esoteric research
Avaantage	488 reports	Completed diligence reports
Commodities Thesis	research/	Metals, oil, stagflation, sector winners
Design Docs	36 files	AI-native hedge fund blueprint

9. Digests Intelligence Archive

```

```

Newsletter Sources

Source	Frequency	Focus
Ed Steer's Gold & Silver Digest	Daily	PM prices, COMEX, SLV shorts, Shanghai
FFTT (Luke Gromen)	Weekly	Macro/liquidity, fiscal dominance
Bear Traps (Larry McDonald)	Weekly	Political risk, credit stress
GATA Dispatch	Daily	Gold manipulation, central banks
Zero Hedge	Ad-hoc	Bonds, Fed, macro

10. Investment Thesis (Summary)

Core Thesis: Fiscal Dominance + Commodity Supercycle

The US (and global) fiscal trajectory is unsustainable. Debt-to-GDP ratios require either: 1. **Inflation** (debase the debt away) → Long gold, commodities, real assets 2. **Financial repression** (cap yields below inflation) → Long gold, short bonds 3. **Default/restructuring** (unlikely for USD) → Long hard assets

Meanwhile: - **Energy underinvestment** since 2014 → supply deficit → oil supercycle - **Defense spending surge** → NATO 3%, India 3%+ → defense stocks - **De-dollarization** → BRICS gold settlement → central bank gold buying - **Silver manipulation** → SLV short squeeze potential → physical silver

Thesis Monitoring

Signal	Source	Threshold
VIX	EODHD / TradingCLI	>35 = deploy trigger
DXY	EODHD / Chart-IMG	<98 = dollar breaking down
10Y Yield	Treasury Direct	>4.5% = Fed intervention needed
Oil (Brent)	EODHD	>\$100 = energy supercycle confirmed
Gold/Silver Ratio	Ed Steer digest	<60 = silver outperforming
SLV Short Position	Short reports via /digest	Watch for squeeze setup
Shanghai Premium	Ed Steer digest	>8% = physical demand strong
COMEX Inventory	Ed Steer digest	Declining = supply tightness
2Y Auction Quality	/digest Treasury data	Tail >1.5bps = fiscal stress

11. Master Thesis Document

The full investment thesis with position-level detail is at:

~/Axion/AxionHedgeFund/CURRENT-THESIS.md (42KB)

This is the single source of truth. /thesis-check compares actual positions against it. /war-room references it for exposure analysis. /digest flags data relevant to it.

12. Manipulation Rules

Documented in memory (market-manipulation-rules.md):

1. **Trump Tweet Whipsaws:** Initial market move reverses within 24-48 hours. Don't chase the initial spike.
2. **Government Oil Suppression:** SPR releases, OPEC pressure. Short-term bearish, long-term bullish (depletes reserves).
3. **Gold/Silver Price Suppression:** COMEX paper shorting during low liquidity (6 PM Globex). Physical demand remains strong.
4. **Treasury Market Intervention:** Fed/PPT buying to cap yields. Unsustainable long-term.
5. **DXY Propping:** Dollar index being artificially supported. Crashes happen suddenly when support fails.

These rules are referenced by /war-room before generating recommendations.

13. Daily Workflow

Morning (8:30 AM ET)

1. /broker-health — verify all tokens active
2. /premarket — or morning-intel pipeline if cron active
3. /digest — process Ed Steer overnight email
4. Review thesis flags from digest

Intraday (if event occurs)

- 5. /war-room "event description" — crisis analysis
- 6. /market-pulse — quick sentiment check
- 7. /portfolio-status — check exposure

End of Day

- 8. /save-session — preserve context for tomorrow

Weekly (Sunday)

- 9. /thesis-check — compare positions vs thesis
- 10. /digest — process FFTT + Bear Traps weekly reports
- 11. Review weekly-screen output

14. Technology Stack

Layer	Technology
Orchestration	Claude Code (Opus 4.6, 1M context)
CLI Tool	TradingCLI (Python, 21K+ lines, uv package manager)
Data Services	Next.js dashboards + FastAPI backends + MCP servers
Broker Connectivity	SnapTrade (Questrade/WS), ib-async (IBKR), kiteconnect (Zerodha)
Charts	Chart-IMG API → TradingView-quality PNGs
Deployment	GitHub Pages (dashboards), Cloud Run (chart-api)
Document Generation	pandoc + pdflatex
Data Storage	JSONL checkpoints, CSV time-series, markdown reports
Memory	Claude Code auto-memory (market-data-latest.md)

15. What’s Unique About This Setup

- 1. **AI-native from day one** — Claude Code isn’t bolted on, it IS the operating system
- 2. **MCP as the bridge** — 73+ tools let Claude directly query brokers, data sources, and services
- 3. **Skills as workflows** — each trading task is a reusable, tested skill with error recovery
- 4. **Parallel agents for speed** — /war-room runs 3 agents simultaneously for <3 min crisis analysis
- 5. **Digest pipeline** — newsletters automatically become structured data + CSV time-series
- 6. **Thesis enforcement** — /thesis-check automatically detects position drift
- 7. **Multi-currency** — operates across INR, USD, CAD simultaneously
- 8. **Research depth** — 400+ files of structured research accessible to Claude via file system
- 9. **Crash-ready portfolios** — pre-built, pre-sized, waiting for trigger conditions
- 10. **Manipulation awareness** — rules for known market manipulation patterns baked into analysis

16. Port Map & Local Services
